Breast - Prostate Consensus

Letter from the Directors

Dear Colleague,

Breast and Prostate Cancers have high incidences all over the world. Their treatment is by no means standardized, especially as regards irradiation.

We organized this meeting in order to try and reach a consensus on the radiotherapy treatment of this widespread diseases, giving all participants the possibility to express their vote before and after each presentation.

We thank you for coming to this meeting and we hope you'll find it useful for your practice in the future.
